

# Company profile

## + The core of our actions

For over two decades, we've pioneered digital innovation, expertly transforming complex business processes into seamless digital operations for leading enterprises and public sector organizations. »Just add digital« – It's not just a slogan for us; it's the ethos that drives everything we do at Almato.

## + Our mission and products

The semantic data platform Bardioc is our core product that enables our customers to fully exploit the potential of their data. With Bardioc, they gain valuable insights and develop innovative AI applications. The platform serves as the foundation for modern, data-driven business models and companies benefit from the opportunity to operate faster, more precisely and more efficiently.

With our Professional Services, we support our clients in process automation and the custom development of software solutions that enhance and optimise business-critical processes. With extensive expertise and experience, we deliver sophisticated digitalisation projects specifically designed to meet our clients' needs.

## + Our value proposition

We focus on technological excellence and customer satisfaction and go beyond our customers' expectations, delivering cutting-edge and tailored solutions that meet the high demands of modern businesses. At the same time, we take responsibility for a sustainable future by integrating environmentally friendly practices into our daily work.

## + Innovative technologies for a sustainable future

At Almato, we strive for progress through technology. AI, automation and current IT developments are integral components of our solution portfolio, providing our customers with secure and efficient tools.
